

Roller blinds

Roller blinds

A roller blind for your balcony glazing gives you excellent protection against sunlight and heat, makes it harder for people to see in and makes your balcony a snug environment. All of our glazing systems are prepared for roller blinds, and come with integrated brackets for the roller cover.

You can choose between several different fabric qualities and colours. The fabrics we supply are made of 100% PVC-free acrylic-treated polyester. The roller blinds are easy to use, and always come with a childproof beaded pull chain.

Caring for your roller blinds

To keep the roller blinds fresh, we recommend carefully dusting or vacuuming them. Stains can be gently wiped off with a damp cloth. Do not use detergents. The roller blinds must be dry when you roll them up.

Classic Daylight

Price group 1

Classic Daylight is a closely woven roller-blind fabric with a smooth surface, and is available in six shades. The fabric provides a high degree of protection against glare. The darker the fabric you choose, the less light allowed into the balcony.

To get a precise idea of the colour and structure, see or order samples.

Sewn-in bottom bar

Classic Daylight comes with a concealed bottom bar in a sewn hem as standard. Optionally, you can order a rectangular or round decorative bar made of aluminium.

4

B8 - Beige

B9 - Sand

B40 - Greige

B24 - Light grey

B26 - Anthracite

B28 - Black

Classic Daylight with standard concealed bar in a sewn hem.

Light and heat

The following table shows the fabrics' functions:

Ts - How much sunlight the fabric lets through.

Rs - How much sunlight the fabric reflects.

As - How much sunlight the fabric absorbs.

Ts + Rs + As = 100%

Colour number	Transmission % (Ts)	Reflection % (Rs)	Absorption % (As)
B8 Beige	13	75	12
B9 Sand	8	62	30
B40 Greige	6	47	47
B24 Light grey	4	40	56
B26 Anthracite	0	15	85
B28 Black	0	2	98

Flow Screen

Price group 2

Flow Screen roller-blind fabric has a screening effect, provides increased translucency and has a textile surface. The fabric is available in five shades.

To get a precise idea of the colour and structure, see or order samples.

Aluminium decorative bar

Flow Screen comes with a rectangular decorative bar made of aluminium as standard. Optionally, you can order a round decorative bar made of aluminium, or a concealed bottom bar in a sewn hem.
